Certified Appalachian Hardwoods Sustainable & Legal
Certified Appalachian Hardwood Sustainable & Legal

The Appalachian Hardwood resource is growing at a rate of 2.45 for every tree that is harvested or dying combined, according to US Department of Agriculture. The growth is the result of modern forest management and wise utilization. Buyers of Appalachian Hardwood logs and lumber can be assured of this because of Appalachian Hardwood Manufacturers, Inc.

An analysis of USDA data finds the growth to removals ratio in the Appalachian forest has increased in the past 12 years.

AHMI introduced the Appalachian Hardwood Verified Sustainable in 2007 to show members producing, distributing and manufacturing sustainable goods from the region. It expanded to include the Appalachian Hardwood Verified Legal in 2011 to show legal products.

AHMI has developed the Certified Appalachian Hardwood and has a third-party company to audit members standards that were approved by AHMI Trustees.

The AHMI program certifies companies who purchase logs and lumber from the 344 counties of the Appalachian Region from northern Georgia through western New York. The region has:

- Forestland of 65.7 million acres
- Top species of Red Oak, White Oak, Hard Maple, Soft Maple, Cherry, Walnut and Yellow Poplar
- Certificates are available from member companies that explain the program and confirm participation.

YOUR QUALITY IS OUR RESPONSIBILITY.

Trust America's Hardwoods Company.

Trust the on-grade quality of Northwest Hardwoods, America's largest and only coast-to-coast hardwood lumber producer. Our inspection and grading ensures that our lumber quality and appearance are both exceptional and consistent. That's why our customers rank us above other brands - we always live up to our responsibility.
