DMSI SOFTWARE

History

- ▶ Founded in 1976
- ▶ Focus on Building Materials Industry

Software for Your Industry

Building materials aren't one-size-fits-all products. That's why our solutions are tailor-made for the unique challenges of buying and selling these materials.

Timber & Logging

Rugged handheld tools for cruising and stumpage management including timber bidding, contract management, log tagging, buying, selling, and production.

Lumber & Concentration Yards

Mobile yard-management tools that eliminate dual entry, keep vendors honest, and manage and ship inventory faster.

Distribution & Retail

Get real-time visibility into your inventory and financials. Calculate costs, maximize production, and do right by your customers.

EUDR

Due diligence

As a general rule, operators (and traders which are not SMEs) must exercise due diligence with regard to all products in scope of the Regulation, from each of their suppliers. This means they must put in place a [due diligence system](#). Operators sourcing commodities entirely from areas classified as low risk will be subject to [simplified due diligence obligations](#)

1. Collect information

[Collect information](#), documents and data showing that the product is deforestation-free and legal, such as geolocation coordinates, quantity, country of production, etc.

2. Risk assessment

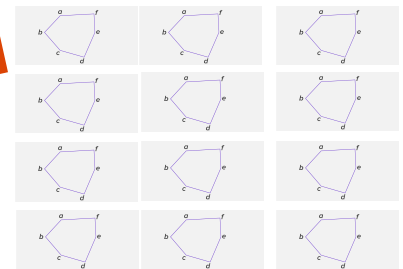

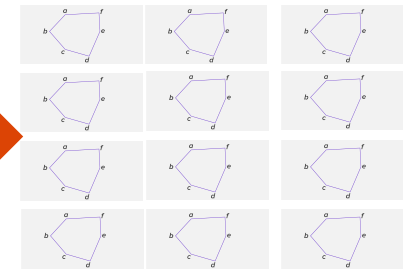

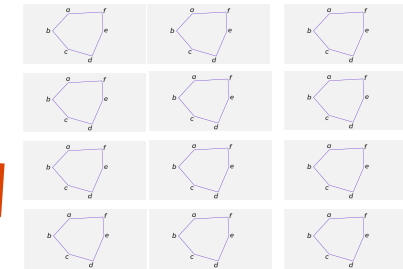

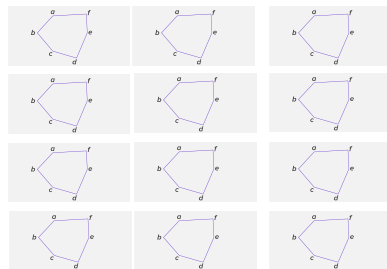

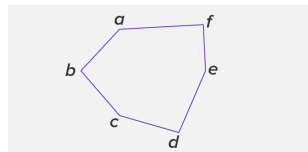

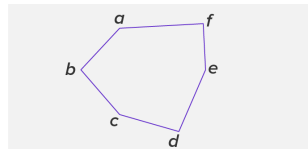

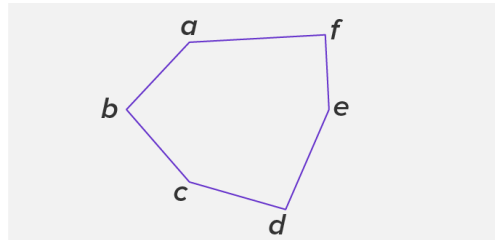

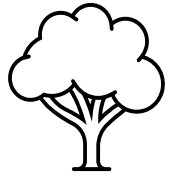

[Assess](#) whether there is a risk the product does not comply with the rules. Operators need to demonstrate how the information gathered was checked against the risk assessment criteria and how they determined the risk.

3. Risk mitigation

Adopt adequate and proportionate [risk mitigation](#) procedures and measures if there is a risk that the product does not comply with the rules. Make sure that the risk becomes negligible.

The screenshot displays the Chainparency web interface. At the top left is the Chainparency logo. The main content area shows a source entry for 'Source ABC' with a 'pending' status. The entry details include an ID, creation and update dates, type, and geo-coordinates. Below this is a 'Custom Fields' section with a table listing 'Certification Number' (CERT123) and 'Vendor Name' (John Abbot Forestry). To the right is a map view showing a satellite image of a forested area with a black circle indicating the source location. The map includes navigation controls like zoom in/out and a person icon. At the bottom of the interface is a text input field with the placeholder text 'What's happening with this location?'.
